1. What are Alert24 News Feeds?
Alert24 is updated throughout the day. Alert24 News Feeds allow you to see new Alert24 content, as soon as it’s added, without having to log on to the service or wait for your daily email.

The Alert24 News Feeds use an emerging web technology called RSS (which stands for Really Simple Syndication).

2. Getting Started
To view and manage News Feeds you first need to obtain some news reader software. There are many different options to choose from – here are a few:
- Feedreader (www.feedreader.com)
- FeedDemon (www.newsgator.com/Individuals/FeedDemon/Default.aspx)

Some browsers have built-in news reader software (Internet Explorer 7 and Firefox). These can be used to manage your News Feeds in the same way that you manage bookmarks.

Once you have installed your news reader software, you need to generate an Alert24 News Feed and subscribe to it.

3. Subscribing to a News Feed
This icon 📥 indicates that a News Feed is available. Click on the icon and your browser will then show you a sample of the selected News Feed. You can subscribe to the feed by dragging or cutting and pasting the URL of the feed into your news reader software.

4. Integrating Alert24 News Feeds into your Intranet Pages
If your organisation has an intranet and subscribes to Alert24, you’re able to integrate Alert24 News Feeds directly into your intranet pages. You will need to consult with your IT team. See the Alert24 terms and conditions for full details.

5. Feed Options
You can create an Alert24 News Feed for any of the standard Alert24 Topics you subscribe to:
